

WADA 2022 PROHIBITED LIST: MAJOR CHANGES

Comes into effect from 1 January 2022

S3. BETA-2 AGONISTS

Permitted doses of inhaled salbutamol have been modified to 600 micrograms over any 8-hour period. The total permitted daily dose (1,600 micrograms over 24-hours) remains unchanged.

S9. GLUCOCORTICOIDS

Local injections have been added as prohibited routes of administration in-competition.

For clarification:
i. oral, rectal, intramuscular and intravenous routes remain prohibited;
ii. inhaled, intranasal, and dermal routes remain permitted.

S0. NON-APPROVED SUBSTANCES

Body Protecting Compound 157 (BPC-157) has been added.

ADDITIONAL EXAMPLES:

Further examples of prohibited substances have been added to various categories.

FURTHER INFORMATION

The full list of changes can be found on the [WADA website](#). For further information on how to comply with the new glucocorticoid regulations, please refer to [UKAD's Glucocorticoid TUE Policy](#).
